

# THE GREAT BRITISH BUILD-OFF

---

**MSA**

Manchester School of  
Architecture

AKA The Future Architect

&

**MSB**

Manchester School of  
Building

AKA The Future Contractor

## Agenda

Redefining & reestablishing the role of the architect as being the facilitator of building practices, within the site of Moston we intend to explore the topic of celebrating diversity of skills and knowledges. We will focus on developing strategies of attaining, processing and re-distributing building knowledges.

## Production & Mastercraft

You will have the opportunity to learn the basic fundamentals of brick laying and use these skills within the Moston Miners Centre. You will collaborate with us on the masterplan for the Miners Centre Community garden and we will be constructing a outdoor brick seating structure to match their brief.

## Collaborator

With a collaborative approach from the students at the Manchester School of Building at Manchester College, Moston Miners Community Arts and Music Centre & North City Community Action Group Construction Department in Moston.
