

## ST. PHILLIPS SALFORD

### Creating a community space in a Grade II\* listed church

#### \_Agenda

We will be running a design workshop for a “Multi-functional Community Space” within the Grade II\* listed church. The aim is to create an outreach space for the church, which is both well designed and flexibel.

#### \_Collaborator

St Phillips Church Salford is a large Church of England building which has recently been taken over by Vicar Gareth Robinson. Although it currently has a small congregation, the church has been earmarked as a “resource church” by the diocese of Manchester. This role involves providing support for the local community as well as other churches.

#### \_Production

To design and renovate an existing multi-use space which is currently used by multiple user groups (including art classes, childrens’ work and church meetings). The aim is to redesign and refurbish the outdated space. During the first week we will run a design competition with the winning design being constructed during the second week.

#### \_Mastercraft

Quickly and efficiently realising community led designs.  
Live construction and understanding of building materials.  
Understanding how to budget a project

Hope you join us for this fun and exciting project.  
Karina, Amelia, Tom and Ash.
