

[forest of bowland]

[19]

[agenda]

Working in partnership with In-Situ and the Forest Of Bowland, the two-week project intends to produce a series of proposals for fixed & mobile shelters for local artists and visitors to enjoy the scenery surrounding Pendel Hill, an area of outstanding natural beauty. Some of these proposals will then be taken forward by the Partnership and developed into genuine pieces of architecture as part of a multi-million pound funded scheme to re-connect people with their landscape.

The design process will involve spending a week in cabins bordering the site, in order to gain a true understanding of the physical and social context.

[collaborator]

In-Situ are an artist-led, not-for-profit organisation based in Lancashire. Through their work, they create responses that reflect where they live and work.
