

# THE SIR SAMUEL KELLY PROJECT

## COORDINATORS:

Mingjun Zhang // CPU  
Muhammad Hamman Bin Mohd Ghazali // MSAP  
Rossarin Ungrangsee // ISR  
See Ting Dawn Wong // ISR  
Tsun Fung Yeung // ISR

## AGENDA

The Sir Samuel Kelly Project is a 'live project' aiming to align the design and building process for a new boat shelter with active research workshops involving ESALA and Queens University Belfast. This joint collaboration from both institutions aims to continue the historical significance of the Sir Samuel Kelly.

The new shelter aims not only to reduce the corrosive processes of weathering that threaten the boat's future, but they also aim to create a new public interpretation space for the town to raise the profile of the longer term project and display the wider maritime heritage of Donaghadee.

## COLLABORATION:

- Sir Samuel Kelly Preservation Society + Donaghadee Trade and Commerce Group.
- Architects: Fraser Bell + Michael Collins
- Dr Ola Uduku (ESELA)
- Dr Gehan Selim (Queens University Belfast)
- Architecture students from both institution
- Support from L Malcolm Cruickshank (ESALA Workshop)
- Manchester School of Architecture

## PRODUCTION :

- Conceptual Sketches for ideas communication
- Physical Model Making Design Process for modelling experiment
- A2 Presentation Sheet for Workshop Process Summary

## CRAFT SKILLS:

Model Making, Brainstorming, Concept sketching
