Atelier: Infrastructure Space

Agenda

Former disused Northlight Mill is set to be the home of a new Arts and Cultural centre for Pendle, East Lancashire. It will be developed after a successful bid to Arts Council England by In-Situ, our collaborator, a non-profit arts organisation based in Pendle. The Garage, part of In-Situ's current on-going projects, is set to be redeveloped as part of the wider Northlight Mill Masterplan into an Arts Exhibition space.

Collaborator

In-Situ are a non-profit arts organisation based in Pendle, East Lancashire. Their vision is to be part of everyday life. For their art to be an art of action. For their art to contribute to society as a whole. For their art to challenge current thinking about environment people place and culture.

Production

Through a two week workshop of design and making, we aim to produce a 1:1 final output that will complement the proposed open-air cinema at the Northlight Mill Arts Centre redevelopment.

Craft

Through this fast-paced design-implementation workshop, we aim to focus on developing the following skills:

- Site specific design
- Conceptual 3D development
- Detailing/Construction @ 1:1
