

M A N C

_AGENDA

Our objective is to explore connections between Manchester and Detroit as cities with great industrial heritage. We will be looking at implications of the industrialisation on city planning and comparing solutions used across the Atlantic. Using the historical records of the Science and Industry museum and Henry Ford museum we will develop an understanding of the infrastructure and their current post-industrial reinvention.

T R O I T

_CRAFT

Students will develop skills in model making, mapping, critical analysis presented in a booklet

_PRODUCTION

Working in groups, the final outputs include a massing model of the two cities at a scale 1:2000 and a comparative case study document of the implications of the industrialisation on the city planning: transportation network, functions zoning and current functions

_COLLABORATOR

Dominic Sagar, MSA lecturer and a founding partner of Sagar Stevenson Architects. SSA were a founding member of a community led 'Northern Quarter Association' and consultants in the strategic regeneration of 'The Northern Quarter'.
