

## 2 RE\_APPROPRIATE

[RE\_MAP]1090

### COORDINATORS\_

Matt T.A. Smith  
Abi Dixon  
Irina Nikova

### AGENDA\_

The re\_appropriation of under-appreciated & under-utilised newly constructed spaces around MMU's Birley Campus. This event aims to draw attention to the potential enjoyment of these spaces, bringing identity and meaning to them through the design of small scale installations. The agenda will be explored and extrapolated within the principles of the [Re\_Map]1090 atelier.

### COLLABORATOR\_

Eddy Fox, Programme Leader of Landscape Architecture at MSA  
John Hindley, MMU Estates and Sustainability Gillespies, landscape architects.  
Capita/Urban Vision, architects and landscape architects.

### PRODUCTION\_

Design and installation of small scale interventions on site. The processes and outputs from each of the event's sessions will be documented for inclusion in the students portfolios and an event blog.

### MASTERCRAFT\_

Following an introduction by members of the practices involved in various stages of the campus masterplan, formal and informal mapping exercises will be undertaken by the students to identify key spaces. Installations will take the form of temporary interventions that could be replicated at larger scales, such as guerilla gardening.
