MANCHESTER //Sketch Fest 2015

PRODUCTION | Manchester Sketch Festival 2015 is conjunction with 150 years of the MSA. The festival as planned will revolve within a full 2 weeks of 'guerrilla'/impromptu sketches and sketchbooks exhibition as well as a range of events that will involve the architects, architecture students and the public as the artworks contributors without any discrimination; professionals and amateurs. We will fill the festival with several sketch-related events like talks, symposium, sharing sessions, sketch-jams and many more.

COLLABORATORS | We are looking at an international collaboration, which involve KLSketchnation from Malaysia as well as Manchester Urban Sketching Group to work with the Manchester School Of Architecture (MSA). There are also possibilities that we might involve the RIBA, MSSA as well as Manchester Society of Architects for the publicity.

AGENDA | To celebrate the importance of sketching to another level; transgressing the borders connecting Kuala Lumpur and Manchester, of it being the source of inspirations towards the inventions of bigger things especially in architecture, arts and design. Sketching contributes towards architecture in both ways; creating architecture as well as interpreting architecture.

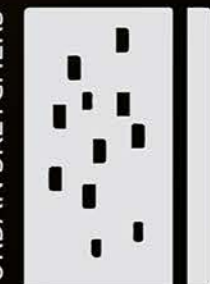

MASTERCRAFT | The event will involve event managements, exhibition curating, set-designing, volunteers organization, community involvement, international professional networking and a complete basic sketching skills development workshop by experienced urban sketchers.
