

YOUR SECRET MANCHESTER

SPATIAL ANALYSIS + DRAWING TECHNIQUES + PUBLIC ENGAGEMENT

AGENDA- Compiling a children's colouring book of prominent places within Manchester thus revealing colour versions of the city's fabric from a child's perspective. By employing an understandable image of the city through axonometric style line sketches, we aim to explore the general public perception of the urban space they inhabit.

COLLABORATOR- Local Children's Charity (To be confirmed with External Liaison Manager)

PRODUCTION- The final output of this event is a public workshop organized together with the Collaborator using large print-outs of the book to encourage live drawing by children and general public and thus market the book for charity purposes. During this event program both students and other participants can understand and interpret the city through a more creative and engaging process.

MASTERCRAFT- The event will offer the students to experiment with different methods of drawing ranging from analogue to digital tools. The students will also have the opportunity to understand the building typologies present in Manchester through their visual analysis. To finalize the design of the book we will use Adobe Illustrator and InDesign to organize the work into a booklet format.
