## AGENDA

Form-finding and exploration looking at biological processes occurring in nature. What can we learn from natural organisms that can inform our architectural designs, focusing on the principals of Atelier QED

## COLLABORATOR

Our event will be working alongside Z-Arts Manchester, who provide a 'creative space for young people' with a priority on encouraging participatory activity. Creative learning is at the core of everything they do, both inside and outside the building. Their mission is to inspire and enable generations of young people from Manchester and beyond to use creativity to maximise their potential.

## PRODUCTION

The aim is to produce an installation(s) that encourages public interaction with architecture and each other. We hope to explore materiality and form-finding based on biological principals.
