BAND
STAND
WORKSHOP
Agenda
We have been tasked with designing a Bandstand for a local community group, formed of musicians and artists. We will develop a modular and creative product and material & for the site. Funding generate Funding was received in the pre-plan.
Production
We want a mixed media approach to the development process. Using CNC Milling, Laser Cutting, 3D Printing and an engraving foreign chemicals. You will be involved in model making, video production, CAD drawing and photomontages to help develop your ideas. These are open to any medium that will help you sell your designs.
Masterpraft
An industry inspired plans to give a workshop on the wood qualities for Form and materials. This will be provide a strong background knowledge to design Form.
Collaboration
Alex Lovell - Architect
Acoustic Engineer - TBC
Local Musicians
Co-ordination
Nick Cox - UW
Kate Brown - UW
Gregory Thorne - MSA
