

100 urban greening

Agenda

Working in partnership with Bruntwood, this 'Events 2018' project intends to re-imagine the relationships that exist between the urban landscape, architecture and nature.

Urban Greening challenges you to respond to the complexities of a live feasibility brief using your skills as designers to consider and apply how we can use vegetation and landscaping around existing buildings to create engaging urban environments.

Collaborator

Bruntwood are a leading property company with a portfolio of 117 properties nationwide. Unique ownership of all of their buildings enables Bruntwood to diversely focus their resources to the research, development and regeneration of the urban landscape making it accessible to everyone, particularly inside the business focused city center.

Production

You will work in teams participating in a series of workshops producing fast paced schematic diagrams, drawings and models responding to the external development of the city center located Alberton House, which will be presented / displayed to Bruntwood.

Coordinators

*Amy Whitmore [ISR] Dillan Anadkat [ISR]
Joshua Griffiths [ISR] Nathan Edge [ISR]
Rebecca Rose [MSAP]*

Craft

*[Site Exploration] [Response Sketching]
[Communication Modeling]*
