

How can we move our publications around and display them for sale without having to pack and unpack bags?

Trolleyfest!

Agenda

Our agenda is to challenge the students to think of applications of our vocation outside of the built environment. Students are required to design and build a scale model of portable, folding storage/display unit to be used at fairs and events to transport and display literature and trinkets sold by the Modernist Society.

Production

A 1:5 / 1:2 scale model of a transportable adaptable sales trolley and as well as a pop-up exhibition.

Craft & Skills

Key skills to be learnt in participating this event include interacting with a live client, concept development and model-making techniques, curation and exhibition skills.

A Joint Effort!

This year we are collaborating with the *Modernist Society*, a creative project founded in 2009 by Jack Hale, Eddy Rhead and Maureen Ward, to celebrate modern architecture through publishing, events, exhibitions and collaborations. We are also thrilled to be working with *Pobi Shop*, a bespoke furniture craftsmanship in a joint effort to assist us in the process of building the adaptable display unit.
