

POSTER RE-POSTER

Events 2019

Agenda, Production, Craft

Design a museum grade display case for a selection of the c.8000 piece international poster collection held by the Special Collections Museum in the MMU Library. The design should engage visitors with the collection, which contains posters from across the globe and across many decades of history. We will be creating a detailed design package which will be used by the Special Collections team to be built with a £2000 budget later.
