

# MANCHESTER SCHOOL OF ARCHITECTURE

## Agenda

Join our Heart and Soil team as we lead a collaborative project with MUD (Manchester Urban Diggers CIC) exploring ways in which we can make allotments more accessible to a wider array of people, focusing on the elderly and those with disabilities. We will be leading a series of workshops to come up with designs based around practical ways to increase accessibility within various allotment spaces run by MUD. This will lead to final idea presentations and, if successful, idea implementation.

## Our Collaborator

MUD are a non profit social enterprise established in 2019. They are dedicated to finding solutions to the problems with our local food systems. This includes; advocating for food sovereignty, being a member of the Community Supported Agriculture (CSA) Network, providing educational services and growing fruit, vegetables and herbs to make available to the local community. They always use organic growing methods and improve local biodiversity and soil health wherever they grow.

## Team

Kat Pikhart  
Millie Barrow  
Oscar Henery  
Lucy Goodier  
Roseline Anton  
Catherine Westhead

## Skills

Sketching  
Photoshop  
Sketch Up  
InDesign  
AutoCAD
