SKILLS

During this Event, participants will be allowed to redefine and rethink conventional play areas through a series of guest lectures, basic software workshops, group discussions, and visual rendering. The thought process will generate creative ways to document and design "Play Areas of the 21st Century".

AGENDA

We aim to bring new perspectives into play areas within the local context of Chorlton. Using Beech Road Park as our site, participants will be analysing, designing, and documenting exciting and age-friendly spaces to benefit the community. The participants will be divided into four groups, each of which explores a different architectural approach to play areas and present their proposals back to the community by the end of the two weeks.
