MAPPING COLOUR

AGENDA

We will be working alongside the BPIC network to encourage diversity in the built environment by targeting youths applying to higher education. We aim to design a pop-up exhibition booth that can be displayed in career events with informative graphics that show the level of diversity across the construction industry in major UK cities. We hope to inspire young professionals; showing them there is a place for them in the industry and how they might get into the built environment.

SKILLS

Model-making (small scale maquettes and larger scale mock-ups), graphic design to produce vibrant eye-catching posters, creative researching, supporting and networking for black and ethnic minorities.
