### AGENDA

Manchester School of Architecture's live project "Walk Ride Chorlton" has now moved online due to Covid-19. The project supports an on-going programme on prompting a healthier and greener community in Chorlton. Participants will interact within the community by bringing out their creative side through a series of designs that will be placed along walking paths, on walls, pebbles, windmills and other objects. Walking is a man's best medicine.

### SKILLS

This project will delve into the way effective masterplanning can help transform not only the attitudes of residents, but also the community atmosphere. To do this we will use a range of media and software, where sketching and collages are encouraged just as much as precise AutoCAD and InDesign work.

### MEET THE TEAM

Iman Habib  
Kiran Farooq  
Isabel McCauley  
Hieu Tran  
Razaw Osman
