

MANCHESTER SCHOOL OF ARCHITECTURE

SKETCHY BUSINESS

AGENDA

In partnership with Manchester Society of Architects, our team will explore different sketching techniques along with post production editing in Photoshop.

Through a series of workshops students will develop sketching and post production skills and exhibit individual and group compositions in an online gallery. Reflection on what makes the workshops engaging and successful will enable the end of the project to cumulate with live workshops put on by our group. These will connect people through sketching and enable the online exhibition to become a place to display all art created from the workshops. Online tutorials will remain accessible after MSA Live to enable others to continue adding to the online exhibition.

SKILLS

We're looking for students with a passion for sketching, drawing & art in all its forms! Over the course of the project will explore different sketching techniques along with post production editing in Photoshop! Basic Photoshop skills would be ideal, but don't worry if you're not familiar with it! We will have a series of workshops where you will be able to develop and improve both your sketching and Photoshop skills!
