

MANCHESTER SCHOOL OF ARCHITECTURE

THERMAL

OASIS

Agenda

Embark on Thermal Oasis, a transformative community endeavour crafting a bespoke sauna, providing restorative experiences for individuals who want to recharge, restore, and reconnect. Dive headfirst into research and design skills, where you will work in groups to develop a sauna, before presenting your design ideas, models, and sketches. We will encourage model making, quick iterative design ideas, as well as creative adobe skills to create collages and technical drawings.
