

MANCHESTER SCHOOL OF ARCHITECTURE

We're diving into the exciting world of furniture design, aiming to create a dynamic modular system tailored for the vibrant "SHOP" gallery in Preston. With prototyping as our guiding principle, we're gearing up to bring our designs to life in full-scale 1:1 models. Beyond just furniture, our project is about cultivating a space where artists can unleash their creativity, pushing boundaries in their exhibitions. Simultaneously, we're dedicated to ensuring users feel not only comfortable but also inspired as they explore the gallery's ever-evolving atmosphere. Join our team and take part in this journey!

SKILLS:

- Teamworking and managing
- Communicating with clients
- Furniture making
- Physical modeling
- Digital modeling
- Modular systems designing

GROUP 22 TEAM:

Saul Bunyan
Gwyneth Chan
Akhshay George Ninan
