

MANCHESTER SCHOOL OF ARCHITECTURE

IN THE

Our project vision is to create a unique space for the wellbeing of both Manchester Foundation Trust (MFT) colleagues and patients. The aim is to renovate the courtyard which acts as the main approach and entrance to MFT's Lime Arts + Wellbeing Centre. Lime Arts plans to collaborate with local gardening groups and commission artists to animate the space, including sculptures, and an annual gardening and growing workshops. We will develop ideas for the revamp of the courtyard in consultation with MFT colleagues, patients and artists.

This live project provides opportunities for students to develop critical design, communication, and project management skills, seamlessly combining art and architecture to deliver ideas and visuals.
